PROFESSIONAL SUMMARY

Analytical and impact-driven Machine Learning / AI Engineer with hands-on experience, building, deploying, and optimising production-grade AI/ML solutions in regulated, data-intensive environments. Proficient in Python, machine learning workflows, and data pipelines, delivering reliable, scalable solutions that support evidence-based decision-making. Skilled in collaborating with cross-functional teams to validate model outputs, enhance solution quality, and prepare AI applications for deployment. Experienced in RAG systems, evaluation frameworks and tooling, REST APIs, cloud-based ML platforms, API-driven architectures, with strong collaboration in cross-functional agile teams.

CORE COMPETENCIES & TOOLS

- **Machine Learning & AI:** Python, Scikit-learn, TensorFlow, PyTorch, Neural Networks, Numpy, SQL, NLP, Text Mining, Pattern Matching, Semantic Analysis, Sentiment Analysis, LLM Applications, Retrieval-Augmented Generation (RAG) Pipelines, Prompt Engineering, Vector Databases & Retrieval Systems (FAISS, Pinecone – conceptual/working knowledge), Evaluation Tooling, Predictive Modelling, Forecasting, Time-Series Analysis, Model Evaluation, Experimentation, Responsible AI, Generative AI, Production AI, Agentic AI, MLOps.
- **Data & Engineering:** Data & AI Engineering: SQL, PySpark, Azure ML Services, Databricks, Cloud-based Data Lakes, Data Pipelines, Workflow Automation, Data Integration, Retrieval and Inference Workflows, Model Deployment, Testing and Validation, Code Documentation, Refactoring, Observability Principles, Production Support, FastAPI, PostgreSQL, Docker, CI/CD.
- **Visualisation & BI:** Power BI, Tableau, Matplotlib, Seaborn, KPI Dashboards, Excel, GraphQL, Insight Communication, KPI frameworks and performance monitoring, Analytical reporting and written briefings.
- **Software Development:** Python, JavaScript, Oracle PL/SQL, Oracle Apex, HTML, CSS.
- **Soft Skills:** Analytical Thinking, Good Communication, Collaboration, Problem Solving.
- **Collaboration & Governance:** Agile, Prototyping, Cross-functional teamwork, Stakeholder Engagement, Storytelling with Data Leadership, Data Governance and ethical AI principles, End-to-end analytical lifecycle (CRISP-DM),

WORK EXPERIENCE

Machine Learning / AI Engineer – Taleforward

December 2025 - Present

- Designed and deployed production-ready NLP and neural network models, reducing classification error by 40% and improving automated decision workflows.
- Built and evaluated forecasting models using time-series and statistical techniques to support business planning and decision-making.
- Built automated evaluation and benchmarking pipelines to validate model performance, robustness, and deployment readiness in regulated environments.
- Collaborated with cross-functional stakeholders in agile environments to translate business requirements into implementation plans and deliverables.
- Produced technical documentation and implemented workflow improvements to enhance model maintainability and operational effectiveness.
- Integrated and debugged REST APIs, data pipelines, and ML inference workflows, improving system reliability, observability, and end-to-end performance.

- Experience building secure, scalable AI systems aligned with enterprise and reference architecture standards.

Data Scientist / AI Engineer – Nacsoft Systems

June 2022 - December 2025

- Owned the development and deployment of scalable machine learning models and real-time inference pipelines, reducing operational inefficiencies by 20%.
- Designed and maintained scalable data pipelines and ML workflows using Python, SQL, and PySpark to support end-to-end AI systems in production environments.
- Designed, tested, documented, and optimised Python scripts and ML pipelines, ensuring robust and scalable solutions.
- Performed EDA, anomaly detection, forecasting, and statistical modelling to generate actionable insights and support evidence-based decision-making.
- Collaborated with Data Scientists and stakeholders to validate model outputs, improve quality, and prepare solutions for deployment.
- Debugged data workflows and participated in solution design discussions to enhance system reliability, scalability, and observability.
- Developed interactive Power BI dashboards, improving KPI reporting accuracy by 35%.
- Contributed to agile delivery through sprint planning, task estimation, and cross-functional collaboration.

Software Application Developer – Neulogic Solutions Ltd

May 2021 - August 2022

- Designed and optimised relational databases (Oracle SQL & PL/SQL), improving reporting and data retrieval performance by 30%.
- Developed secure, scalable applications with strong focus on data integrity and governance.
- Collaborated with multidisciplinary teams to deliver data-driven systems aligned to organisational requirements.
- Developed the first Pension App for the company increasing the number of their clients and their client's satisfaction by 20%.

IT / Technical Support – Stella Maris College

June 2019 - April 2021

- Provided technical support to the staff and students, resolving the school's premise equipment issues.
- Troubleshooted hardware/software issues, improving system uptime by 30%.
- Trained students and teachers in digital tools, increasing tech adoption by 25%.

EDUCATION

Msc. Artificial Intelligence & Robotics – University of Hertfordshire, United Kingdom.

September 2022 - October 2024 – University of Hertfordshire, United Kingdom.

Grade: Distinction

B.Eng. Computer Engineering – Michael Okpara University, Nigeria.

September 2013 - May 2019

Grade: CGPA: 4.40/5.00

CERTIFICATIONS

- **Claude AI Certified Architect** – Anthropic
- **Google Analytics Certification** – Google

- **SQL for Data Analysis** – LinkedIn Learning
- **Python in Excel** – LinkedIn Learning
- **Scrum Fundamentals Certified** – SCRUMstudy

VOLUNTEERING

IT Trainer Co-ordinator – Equal Education Chances, United Kingdom

July 2023- Present

- Led IT training impacting 100+ young people.
- Delivered training on introduction to programming, data analytics, and digital design.
- Conducted trend analysis to improve outreach program relevance.

PROJECTS

- **Research Project- Sentiment Analytical System:** *Designed and implemented an NLP-driven sentiment analysis system in Python to classify patient sentiments on prescribed drugs. Built end-to-end machine learning workflows including data preprocessing, model training, evaluation, and deployment using Azure ML Services. Conducted rigorous model evaluation and data quality checks to ensure reliable outcomes. Developed reproducible pipelines and documentation to support maintainability and future enhancements within a cloud-based environment.*
- **Personal Project – Retrieval-Augmented Generation (RAG) Research Assistant:** *Built a production-grade Retrieval-Augmented Generation (RAG) research assistant using Claude Sonnet, Voyage AI embeddings, ChromaDB, FastAPI, and Streamlit. Implemented hybrid retrieval, reranking, citation-aware question answering, multi-document synthesis, research gap detection, and evaluation pipelines to improve answer faithfulness and reduce hallucinations. Containerised the application with Docker and developed a modular architecture suitable for deployment and scaling.*
- **Personal Project- SMS Spam Detection System:** *This involved data collection, which consists of extracting SMS from mobile phones as an XML file, converting it into a CSV file using Python, data cleaning, and continuing the design and implementation process using CRISP-DM, machine learning, and Python. This is to enhance and improve the detection of spam messages sent directly to our mobile phones.*

RESEARCH PUBLICATION

- Healthcare Applications of Augmented Reality (AR) and Virtual Reality (VR): Immersive Simulation in Medical Clinical Education. Book: Creating Immersive Learning Experiences Through Virtual Reality (VR). (pages 201238). Publisher: IGI Global <https://www.igi-global.com/chapter/healthcare-applications-ofaugmentedrealityarand-virtual-reality-vr/356909>
- Personalizing Medicine for Fake Drug Prevention with AI-Driven Digital Twin. Book: AI Powered Digital Twins for Predictive Healthcare. Publisher: IGI Global <https://doi.org/10.4018/979-8-3373-0538-7.ch010>
- Distributed Cybersecurity Pre-emptiveness on Industrial IoT Network Infrastructures. Book: Blockchain Detection of Cybersecurity Attacks and Risk Management. (Pages 87-116).
